

# Guidelines for Home based care of 2019-nCoV Novel Corona Virus (2019-nCoV)

Any person(s) suggestive of 2019-nCoV, should be confined at home for a period of 14 days and avoid close contact with public and other members in the family.

## Guiding Principles for home care

1. Be informed about the illness.
2. Stay home, preferably isolate himself / herself in a separate & well-ventilated room. Avoid common areas frequented by other members of the family.
3. Avoid close contact with others. If inevitable, always maintain at-least two meters distance.
4. Avoid having visitors.
5. Avoid frequent touching of face
6. Avoid hand shaking and wash hands frequently with soap and water. In case of non-availability of soap and water, commercially available hand rubs can be used
7. Take plenty of fluids.
8. Follow cough etiquettes -
  - Cover mouth and nose with a tissue/ handkerchief when coughing or sneezing; In case tissue/handkerchief is not available cough/ sneeze onto your upper arm or shoulder; coughing/ sneezing directly onto hands should not be done.
  - Turn away from others when coughing or sneezing
  - Do not spit/blow nose here and there, use a water filled receptacle for collecting sputum, there by minimizing aerosol generation.

**Monitor your health for appearance of symptoms like fever, cough and/or breathing difficulty. If you develop any of these symptoms please do contact 0883 6612345**
