

G.S.L DENTAL COLLEGE & HOSPITAL

GSL Dental college Hospital

(Promoted by G.S.L. Educational Society, Regd.No.546/1999)

7.2.1 Best practices as per NAAC format

GSL Dental college includes **Super Intern Program** which is designed to equip dental students with advanced skills, making them well-prepared for professional practice. It integrates key components like **L.I.F.E** (Laser, Implant, Facial Esthetics, Endodontics), **B.A.S.I.C.S**, and hands-on training in various specialties.

The **L.I.F.E** module includes the following aspects:

- **Laser:** Training in laser dentistry for procedures like soft tissue surgeries , depigmentation procedures.
- **Implants:** Advanced techniques in dental implantology, including placement, restoration, and managing complications like peri implantitis.
- **Facial Esthetics:** Aesthetic procedures like Botox and dermal fillers to enhance aesthetics of an individual.
- **Endodontics:** Focus on modern root canal treatments, using both rotary and conventional methods.

In **Implantology**, students receive comprehensive hands-on training in implant placement, restoration, and post-operative care, ensuring they're equipped for complex cases.

Rotary Endodontics emphasizes the use of rotary instruments for efficient, precise root canal procedures.

B.A.S.I.C.S ensures a strong foundation, combining **Basic** clinical skills with **Advanced** procedures and specialization in emergencies arising during dental treatments and their management.

Additionally, interns are trained in **Basic Life Support (BLS)** to handle dental emergencies confidently.

These best practices combine to provide a holistic learning experience, focusing on **clinical excellence, innovation**, and **patient care**, ensuring that students graduate as highly skilled, compassionate dental professionals.

LASER

As a part of "SUPER INTERN" program An advanced training program was conducted on 20 and 21st November, 2023 in GSL Dental College. It has emphasized the importance and use of lasers in various dental procedures. This course is intended for dentists who wish to improve their abilities and understanding of using laser technology in dentistry. A detailed lecture on lasers in clinical practice and hands on was given by Dr.Peeyush Shivhare, who is the senior resident of All India Institute of Medical Sciences.

BASICS AND BLS

A program was conducted from 9th January 2023 to 13th January 2023 in GSL Dental College for BASICS and BLS. It has emphasized the significance of handling the cases in emergency wards and intensive care units at par with the medical students. BASICS program is unique which incorporates all the elective and emergency procedures where a dental student can confidently encounter and treat patient with any medical emergency. GSL institution has high end mannequins for training dental students. In GSL dental college, any student enrolled participated can use the facility and train themselves to perfection.
