

GSL DENTAL COLLEGE & HOSPITAL

(Promoted by G.S.L. Educational Society, Regd.No.546/1999)

Key attributes of a dental college include:

BASICS - Basics of Anesthesia, Surgery and Intensive care in Clinical Scenario

The program helps in improving fine motor skills and hand to eye coordination and helps in gaining confidence and increased levels of competence in the student before proceeding onto patient. The programs emulate the real work environment and have allowed the students to learn skills and to become competent in treatment care.

“LIFE” INTO PRACTICE (L – Laser, I – Implant, F – Flaps, EEsthetics and Endodontics)

This program in the curriculum intends to teach the students about the laser physics and application of lasers in dental science and patient treatment, the surgical aspects of implant dentistry, flap surgeries, facial esthetics and rotary Endodontics.

SQUARE ONE

To instill confidence in students as they are the primary care providers for patient to Plan and provide multidisciplinary healthcare for a wide variety of patients and to apply scientific principles to learning healthcare using critical thinking, evidence based clinical decision making and technology based information systems.

These attributes collectively contribute to producing skilled, knowledgeable, and ethical dental professionals capable of handling a wide range of dental healthcare challenges.
