

# Department of physiology

## PROGRAMME OUTCOMES:

At the end of the course, the student shall be able to:

P.O.1. Explain the normal functioning of all the organ systems and their interactions for well co-ordinated total body function.
P.O.2. Assess the relative contribution of each organ system towards the maintenance of the milieu interior.
P.O.3. List the physiological principles underlying the pathogenesis and treatment of disease.

## COURSE OUTCOMES:

At the end of the course, the student shall be able to:

C.O.1. conduct experiments designed for the study of physiological phenomena.
C.O.2. Interpret experimental and investigate data.
C.O.3. Distinguish between normal and abnormal data derived as a result of tests which he/she has performed and observed in the laboratory.
